Chapter 11 • Skills Practice

Lesson 11-1

- When text messaging on a telephone, pressing a 3 types D, E, F or 3. Pressing a 7 types P, Q, R, S, or 7. How many messages are possible by pressing a 3, a 7, and then a 3? **80**
- At a company, each employee has an ID that consists of 2 digits followed by a letter. The letters Q and X are not used. How many employee IDs are possible? **2400**
- If there are 8 finalists in a talent show, how many ways can a winner and a runner-up be chosen? **56**
- Jim's soccer team has 18 members. How many ways can the coach choose a right forward, a center forward, and a left forward? **4896**
- Erin's health club offers 7 types of aerobics classes. She plans to attend 4 classes this week. How many ways can she choose 4 classes that are all different? **35**
- Francesca can take 4 of her 14 books on a trip. How many ways can she choose them? **1001**

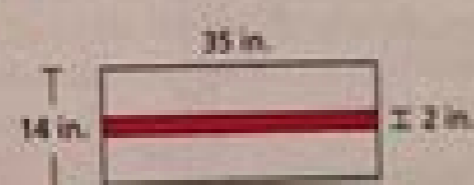

Lesson 11-2

Two number cubes are rolled. Find each probability.

- Both cubes roll the same number.  **$\frac{1}{6}$**
- The sum is greater than 8.  **$\frac{5}{18}$**
- The sum is 8 or less.  **$\frac{13}{18}$**
- Both cubes roll even numbers.  **$\frac{1}{4}$**
- What is the probability that a random 2-digit number is a multiple of 7?  **$\frac{13}{90}$**
- What is the probability that a randomly selected day in January is after the 20th?  **$\frac{11}{31}$**
- A mother is making different lunches for each of her 3 children. If each child grabs a lunch bag at random, what is the probability that all 3 children will get the correct bag?  **$\frac{1}{6}$**
- A teacher writes MATHEMATICS on a piece of paper and then cuts out each letter and puts them all in a bag. She will draw two letters at random. What is the probability that she will select an M and an A?  **$\frac{4}{55}$**

The shaded region is vertically centered in the flag. Find each probability.

- a random point inside the flag is in the shaded region  **$\frac{1}{7}$**
- a random point inside the flag is above the shaded region  **$\frac{3}{7}$**

A marble is drawn from a bag and then its color is recorded in the table.

- Find the experimental probability of drawing a blue marble. **0.32 or 32%**
- Find the experimental probability of drawing a pink or a yellow marble. **0.48 or 48%**

Marble Drawing Experiment	
Color	Times Drawn
Pink	12
Green	10
Blue	16
Yellow	12
